

Good participatory practice

Guidelines for biomedical
HIV prevention trials
2011

Mitchell Warren
Executive Director, AVAC

*Presidential Commission
for the Study of
Bioethical Issues
August 29-30, 2011*

What do we mean by stakeholder engagement?

- Stakeholder engagement is **not** recruitment!
(recruitment is recruitment)
- It is a process of utilizing the expertise stakeholders have to improve the research process and shape it together

Examples of Research Stakeholders

How is GPP different than GCP (Good Clinical Practice)?

GPP is about working with stakeholders

Contents of GPP, 2nd Edition

Section 1: The Importance of Good Participatory Practice

The Importance of Good Participatory Practice

defines the key terms used in the document and describes the realities and the underlying determinants of the HIV epidemic, the context of conducting biomedical HIV prevention trials, and why a participatory approach is necessary to effectively conduct trials.

Section 2: Guiding Principles of GPP in Biomedical HIV Prevention Trials

Guiding Principles of GPP in Biomedical HIV Prevention Trials

outlines the set of principles that serve as the foundation of the relationships among trial funders, sponsors, and implementers and other stakeholders.

Section 3: Good Participatory Practices in Biomedical HIV Prevention Trials

Good Participatory Practices in Biomedical HIV Prevention Trials

describes optimal practices for trial funders, sponsors, and implementers to follow when designing, conducting, and concluding biomedical HIV prevention trials. Under 16 topic areas, this section outlines expected stakeholder engagement activities that take place at each stage of the research life-cycle.

Stakeholder Advisory Mechanisms

Community Advisory Boards (CABs) are only one of many ways that research teams can engage with stakeholders

Examples of How to Engage

Community Advisory Boards (CABs) are often necessary, but seldom sufficient for adequate stakeholder engagement plans.

There may be many more effective ways for research teams to engage with other stakeholders.

The GPP guidelines need to be adopted & implemented
