Re: John C. Cutler, M.D.

Dear Steve:

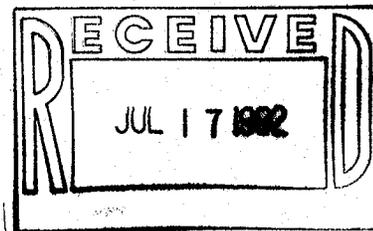

I would like to nominate Dr. John Cutler for the Thomas Parran Award. As you can see from his enclosed curriculum vitae, Dr. Cutler has devoted almost all of his 50 year medical career to sexually transmitted diseases. At various times in his career, he has served in The U.S. Public Health Service, Pan American Sanitary Bureau and the NIH. His highest rank in the U.S. Public Health Service was Assistant Surgeon General. For nearly 25 years, he has been a distinguished faculty member at the Graduate School of Public Health, University of Pittsburgh. He has authored or co-authored 90 scientific publications. Almost all of them are related to some aspect of sexually transmitted diseases. One of his major research interests has been studying prophylactic methods for the control of STDs. Dr. Cutler is member of a many professional and scientific societies.

It would be difficult to find anyone else in American Medicine who has had such a long, distinguished, productive career in STDs, therefore, I would give John Cutler my highest recommendation for the Thomas Parran Award for 1992.

Yours sincerely,

Jew
